From October 29 to 31, the XVIII International Exhibition UzEnergyExpo and XIII International Exhibition UzStroyExpo were held at JSC NEC Uzexpocentre, which brought together leading representatives of related industries — energy and construction — in one exhibition complex. This year, the exhibitions covered Pavilion No. 1, 2, 3, and the Atrium Hall. The total area exceeded 2,600 square meters. As part of the event, 195 exhibitors from 11 countries presented their products, namely from Uzbekistan, Austria, Azerbaijan, Belarus, Iran, Kazakhstan, China, Russia, Saudi Arabia, Turkey, and Ukraine. The largest number of exhibitors came from the People's Republic of China. Every year, manufacturers from Iran participate under a single national stand, while the Republic of Bashkortostan and the Chelyabinsk Region presented collective stands.

The exhibition UzEnergyExpo-2024 presented modern technologies and the latest achievements in the field of electric power engineering, renewable energy sources, lighting technology, automation, as well as components of electrical equipment. Along with this, enterprises producing various types of electrical equipment presented their high-tech and innovative solutions. The general sponsor of the exhibition was LONGi SOLAR, and the registration sponsor was JINKO SOLAR, which are one of the largest Chinese manufacturers of solar panels.
